IDS M3xURLA — Index Date Export (52589)

Issue

- ⚙️ Previously, the wrong ARM *Index Date* was being sent the IDS. For an *Initial Disclosure* submission, the export used the *Loan Estimate Date Issued*; for a *Closing Package* submission, it used the *Closing Disclosure Date Issued*. As a result, the date received by IDS did not match the *Index Date* entered on the *Product & Pricing* screen.

Fix

- ✓ Updated the IDS M3xURLA export mapping so the ARM *Index Date* is sourced from the *Index Date* on the *Product & Pricing* screen, regardless of whether the request is for Initial Disclosures or a *Closing Package*. The corrected value is exported to the applicable index-date mapping used by IDS.

DocMagic Direct — Flood Insurance Policy Details Not Exporting (52459)

Issue

- ⚙️ When *Flood* was selected as the insurance type, in *Production > Closing Information > Insurance & Escrows > Add/Edit Insurance* lightbox, DocMagic Direct did not export the flood insurance Policy/Binder Number or *Effective Date*. As a result, those values were present in Path but missing from the outbound MISMO 3.4 XML.

Fix

- ✓ Updated the DocMagic Direct MISMO 3.4 mapping so flood insurance details are included in the outbound XML.

- ⚙️ In some accounts, the sunsetted options of *Xactus - Credit Plus, Inc.* and *Xactus - Credit Plus. - Soft Pull* were still available for selection in the *Add/Edit Vendor* lightbox in *Business Units > Interfaces*.

Fix

- ✓ These options have been removed and are not available for selection for all accounts.
